How we do it

Property Investment

Demographic Data Assessment

We begin by researching and creating analysis of demographic data. Research covers population growth, age and income distribution, and employment opportunities in the chosen area. Demographic or 'People' data serves as our indicator, helping us understand the potential tenant or buyer base.

Migration Patterns

We delve into migration patterns and market dynamics, examining whether people are moving into or out of the area and the reasons behind these trends. This information helps us anticipate changes in property demand and identify investment opportunities.

Market Competition and Pricing

We also consider market competition and pricing. Understanding the local real estate market's competitive landscape and pricing trends is essential for making informed investment decisions. By combining demographic insights with market conditions, we aim to maximise the potential for successful investments.

Client Case Studies

We explain challenges to Property Investment

The Challenge

Many Australian families face hurdles when trying to invest in property.

They often struggle to get affordable loan rates, or save up enough for a down payment, and navigate the complicated loan approval process.

Understanding property market rules, like who can invest and tax rules, can be confusing too.

The Solution

We help families find the best loan rates, so they can afford to invest. We also assist with planning and simplify the loan approval process.

Next, we delve into impressive growth that some of our clients have obtained in the last few years by following the Option plan.

Bill and Linda's Story

Meet the Johnson family, transforming their financial future through the expert guidance of Raphael Bove and the Option team.

Bill and Linda, with an eye on a comfortable retirement, have invested in carefully selected property for several years, closely following Raphael's strategic advice.

The turning point for Bill and Linda was their decision to transfer these investments to their children. This is not merely a transfer of wealth; it is a significant gift made possible by Raphael's expertise, providing their children with a solid financial foundation.

It's not just about financial success; it's about creating a lasting legacy that benefits future generations, thanks to the assistance of the Option team.

We take great pride in contributing to life-changing decisions, understanding that our guidance significantly impacts their retirement and their families' financial security.
